BASIC AI COURSE

**“LEARN HOW TO USE AI SAFELY
AND CREATIVELY.”**

10 LESSONS • 12–15 HOURS

WHAT YOU’LL LEARN:

- How to use Large Language Models (LLMs) safely and effectively.
 - Explore LLM features: summarization, translation, brainstorming, coding help.
 - Learn to work with different AI tools that support better project development.
 - Create simple AI automations with no-code tools.
 - Start coding with AI as your helper (mini-games, chatbots).
 - How and when to use different AI tools to stay upto-date
- 👉 **Outcome: Build 2–3 mini projects and a portfolio showcase.**

ADVANCED AI COURSE

“BUILD AND DEPLOY REAL AI SYSTEMS.”

12 LESSONS · ~18 HOURS

WHAT YOU'LL LEARN:

- An interactive introduction to how LLMs are built: the science, training methods, and key concepts explained simply.
- Best practices in modern AI: stay up-to-date with current methods and safe use.
- Build RAG bots that answer questions from custom documents.
- Fine-tune small LLMs with personalized datasets.
- Create AI agents and advanced automations.
- Design and use MCPs (Model Context Protocol) for powerful AI workflows.
- Experiment with vibe coding to create interactive and generative coding projects.
- 🖱 Outcome: Publish portfolio-ready projects like a RAG bot, fine-tuned tutor, AI agent, and MCP workflow.

Why Choose AI4AKID?

- ✓ Designed for ages 14+
- ✓ Safe and structured learning environment
- ✓ Portfolio-focused projects for college and career readiness
- ✓ Trusted by parents and schools
